Dear Sir:

In the above referenced patent application, please consider the following
amendments and remarks.**Clean version of replacement claims for entry:**

1. A commune system for providing a commune, constituting
program content concurrently delivered to a plurality of subscribers, who are
equipped with wireless subscriber devices, via a cellular communication network
that includes a plurality of cell sites, each of which provides a plurality of wireless
communication channels in a cell that covers a predetermined volume of space
around a cell site transmitting antenna, comprising:

program manager means for receiving program content from a plurality of
program sources;

processor means for selecting at least one of said plurality of cells to
provide a to a plurality of subscribers who are authorized to receive said
commune and who are served by said selected cells, independent of the
